TWO COAT EXTERIOR PRIMER

Our meticulous two-coat process begins with an alkyd sealing layer to prevent tannin migration, followed by a high-performance acrylic primer. The outcome? Unparalleled clarity and durability, ensuring clear all heart Reserve quality inside and out.

SUPERIOR WOOD

Crafted from premium, kiln-dried clear all-heart Redwood, our product is naturally engineered for outdoor applications and is adept at withstanding even the harshest weather conditions.

SURFACING, SIZES, LENGTHS

Clear all-heart Reserve is available in an extensive array of sizes and patterns to suit any project. Whether you require S1S2E or pattern stock, we provide lengths of 16' and 20'

1x4 – 1x8 S1S2E
2x4 – 2x12 S1S2E

CLEAR ALL HEART FASCIA, SIDING, TRIM

Enhanced Resistance:

Derived from the heart of the tree, this wood boasts exceptional resilience against both pests and fire.

Stability Through Kiln Drying:

Subjected to meticulous kiln drying, this wood is rendered stable, ensuring minimal shrinkage and warping over time.

Tannin Protection with Alkyd Sealing:

Fortified with an alkyd sealing resin, this wood is shielded against tannin migration, preserving its pristine appearance for long periods.

Durable Double Priming:

With a double primed surface, the substraight is fortified for enduring durability, ensuring its finish withstands the test of time.

Experience excellence with Clear all Heart RESERVE

Crafted with precision and treated to perfection, ensuring unparalleled quality. Utilizing cutting-edge technology for application and curing, our premium Redwood stock is engineered to endure for generations. Delight in a stunning, resilient product that arrives ready for installation and final painting, elevating your craftsmanship instantly.
